TRINH QUOC TRUNG

AI Engineer

Email: trinhquoctrung10504@gmail.com | Mobile: 0865498733 | Linkedin: trungtrinh10504 | Github: trungtrinhquoc

EDUCATION

FPT University September 2022 - September 2026

Bachelor of Information Technology | Specialization: Software Engineering

- *GPA: 8.2/10*
- *Awarded 30% Academic Scholarship*

WORK EXPERIENCE

Dräxlmaier Automotive Vietnam **AI Engineer** **June 2026 - present**

- Developed a PySide6 (Qt6) desktop application AI vision system for wire-harness defect inspection.
- Implemented OpenCV image alignment (SIFT + RANSAC Homography) against a Golden Reference to correct perspective distortion and mechanical vibration.
- Trained YOLOv8 models using PyTorch and deployed optimized ONNX models for CPU inference, achieving ~12 ms/frame latency.
- Engineered an optical LED trigger (OpenCV & temporal debounce) for automated cycle detection, replacing hardware sensors.

Open Web Technology Vietnam **AI Engineer Intern** **August 2025 - March 2026**

- Engineered a production multimodal AI storytelling pipeline (GPT-4o, Vertex AI Imagen, Cloud TTS), maintaining consistent character design across 6–14 scenes.
- Reduced API token consumption by 44% via compact prompt templates and structured outputs.
- Decreased generation latency by 27% via Python async workers, and improved Time-to-Interaction by 60% through progressive content streaming.

PERSONAL PROJECTS

FUOJT – OJT Management Ecosystem **AI Engineer**

- **Technologies**: C# .NET 9, PostgreSQL, Gemini API, TypeScript
- Developed an AI-assisted candidate screening workflow combining format validation with Gemini-based candidate-job suitability assessment.
- Built a multimodal document-processing pipeline for raw text, PDF, and Word documents; designed strict JSON output schemas for automated form completion and downstream recruitment workflows.

Mini RAG System **AI Engineer**

- **Technologies**: Python, FastAPI, OpenAI API, FAISS, Hugging Face
- Engineered a complete RAG pipeline via FastAPI, orchestrating PDF ingestion, OpenAI embeddings, and FAISS vector search (top-k=5) to synthesize context-grounded answers with GPT-4o.

TECHNICAL SKILLS

Programming Languages: Python, Java, C#, SQL
AI & Machine Learning: Computer Vision, Object Detection, RAG, Generative AI, PyTorch, YOLOv8, OpenCV, FAISS, Hugging Face, ONNX Runtime
Frameworks & Libraries: FastAPI, PySide6 (Qt6), C#/.NET 9
Database: PostgreSQL, Supabase, SQL Server, Firebase
Tools: Git, Github, Docker

CERTIFICATIONS & LANGUAGES

- **Certifications:** Databases and SQL for Data Science with Python
- **Languages:** English - Working proficiency | Japanese - Elementary proficiency, approximately N5 level
