

TRINH QUOC TRUNG

AI Engineer

Email: trungtqde180411@fpt.edu.vn | Mobile: 0865498733 | LinkedIn: [trungtrinh10504](#) | Github: [trungtrinhquoc](#)

EDUCATION

FPT University

September 2022 - present

Bachelor of Information Technology | Specialization: Software Engineering

- GPA: 8.2/10
- Awarded 30%** Academic Scholarship

WORK EXPERIENCE

Open Web Technology Vietnam

AI Engineer

August 2025 - Present

- Built production AI storytelling pipeline for mobile app, orchestrating GPT-4o (text), Vertex AI Imagen (images), and Cloud TTS (audio) to generate personalized children's stories.
- Integrated a multimodal AI pipeline (text → image → audio) while maintaining consistent character design across 6–14 scene story sequences.
- Token Optimization: Reduced consumption 44% (850→480 tokens) via compact prompt templates and structured output design
- Reduced generation latency 27% (49s→36s) by generating 5 scenes concurrently in Python with async workers progressive result streaming
- Improved user experience by reducing Time-to-Interaction 60% (20s→8s) by delivering text first while multimedia generated in the background

FPT Software

Java Developer

May 2025 - August 2025

- Worked with Japanese clients when they reported software bugs.
- Investigated and found the root cause of the bugs.
- Fixed bugs and checked to make sure the system worked well.

PERSONAL PROJECTS

Mini RAG System

AI Engineer

- Technologies:** Python, FastAPI, OpenAI API, FAISS, Hugging Face
- Built a complete RAG pipeline using FastAPI as the backend, OpenAI embeddings to vectorise document chunks, FAISS for fast nearest-neighbour retrieval, and GPT-4o to synthesise final answers from retrieved context.
- PDF ingestion → text extraction → chunk splitting, Embedding generation via OpenAI text, Vector storage and similarity search with FAISS, Top-k = 5 chunks passed as context into GPT-4o prompt.

RetailX – Multi-tenant Sales & HR Management System

AI Engineer

- Technologies:** ASP.NET Core MVC, Microsoft SQL Server, OpenAI API, JavaScript/HTML/CSS
- Developed an AI chatbot that helps users analyze revenue, costs, and profits, providing real-time insights and actionable recommendations.
- Designed AI prompts to process financial data and generate tailored business strategies.
- GitHub Repository:** RetailX

RetailX is a web-based platform designed to help retail stores, chains, and SMEs manage sales, inventory, human resources, and financial reports.

SKILLS

Programming Languages: comfortable with Python(FastAPI); Solid in Java (familiar with Spring MVC); basic in TypeScript/Javascript, HTML, CSS.

Database: Firebase, PostgreSQL(Supabase), MySQL, SQL Server

Tools: VSCode, Cursor, IntelliJ IDEA, Git, Github

CERTIFICATIONS

- [Databases and SQL for Data Science with Python](#)
- [Software Development Lifecycle Web Design for Everybody](#), [Basics of Web Development & Coding](#)
- Top 5** social activity contributor of semester Spring 2023
